Dear Educational Institutions,

We are a religious organization, who have traveled from city to city visiting different schools, colleges and universities. We became aware of a growing need and barriers that are preventing vital resources from getting to students who really need services, such as financial literacy, career readiness and career counseling.

Students are graduating from high schools and colleges at enormous rates, yet many graduates lack basic financial literacy skills like balancing a simple check book. After having successfully completed high school and/or college, many students also struggle with job placement, resume writing, interviewing skills and communication skills to where they are being shut out of the job market.

Once reality sets in, many students feel ashamed and are left devastated to where they do not know where to turn or where to go for help. We are here to help close this community gap, build confidence and take away the shame that is hindering our community and hindering some of our students from moving forward in a positive and healthy way.

We'd like to bring our services to your school or college campus twice a year (every six months) in March and September any day of the week. We propose having two separate student workshops on campus:

1.) A three (3) hour Financial Literacy Workshop where we partner with Regions Bank and the [Federal Reserve \(Bank\) Education](#) that involves advance workshops, in addition to the following introductory workshops:

- **Evaluations/Self-Assessments**
- The 3 C's of Credit (for borrowing)
- The 3 C's for Financial Success (personal finance)
 - Character & Consistency (Session 1)
 - Capacity & Commitment (Session 2)
 - Capital, Collateral & Confidence (Session 3)

- Each Participant will have access to Regions Bank Customer Service staff present on site for questions, Banking Information, Financial Assistance, Assistance with Opening Bank Accounts, etc.

Also, upon completion of our Financial Literacy Workshop in collaboration with Regions Bank and the [Federal Reserve \(Bank\) Education](#), each student will receive a **Certificate of Completion** in recognition of their outstanding contributions, dedication, and commitment to excellence.

2.) A three (3) hour Career Readiness & Career Counseling Workshop that involves the following:

- **Evaluations/Self-Assessments**
- Mock Job Interviews
- Resume Assistance
- Career Action Plan
- Develop/Draft Personal Biography
- Set Up Professional Profile on [griefcc.org](#) & LinkedIn
- Work Checklist
- Utilize Journal Therapy: Interview Questions.

Career Readiness Program in Coordination with Career Counseling

Dear Clients,

Our Career Readiness Program in Coordination with Career Counseling allows students to develop core skills, such as communication, critical thinking, teamwork, and professionalism to succeed in the workplace. Our focus is to help students manage their careers long-term as our services help students go beyond just getting a job. Students develop a hunger for knowledge and interactive hands-on experience, while being adaptable, flexible, effective, and ready for growth and new challenges in any professional environment.

Our Career Counseling program combines both hard skills (technical abilities) and crucial soft skills, preparing individuals for evolving job markets through continuous learning and professional development. We collaborate and connect students with training programs, colleges, universities, TRIO math and science upward bound programs (**Southern University at New Orleans: SUNO**), internships, and work study and summer job placement. Students develop their own professional profiles with biographies, obtain their own professional websites with personal url to boost career opportunities and visibility, receive resume assistance, engage in mock job interviews to build confidence and self-esteem and participate in journal therapy to enhance writing and communication skills.

Our Career Readiness Program focuses on the following:

- Critical Thinking/Problem Solving: Analyzing issues, making sound decisions, and overcoming obstacles.
- Communication: Effectively conveying information orally, in writing, and listening actively.
- Teamwork/Collaboration: Working effectively with diverse groups to achieve shared goals.
- Digital Technology: Using relevant digital tools and platforms proficiently.
- Professionalism/Work Ethic: Demonstrating responsibility, integrity, and strong work habits.
- Leadership: Motivating self and others, and capitalizing on team strengths.
- Career Management: Setting goals, planning career paths, and navigating transitions.
- Global & Intercultural Fluency: Understanding and respecting diverse perspectives and cultures.

Our services are important to students, schools, colleges, universities and employers because of 1.) Employer Demand: Employers across industries value these core competencies for successful hires; 2.) Lifelong Success: It builds the foundation for growth, adaptation, and leadership throughout a student's entire career; and 3.) Adaptability: Prepares students for changes in technology and work environments, which are critical in our 21st century global society.

If you or anyone you know can benefit from our services, please visit our website at griefcc.org, contact us at 601.324.0227 or 985.285.8712 or email us at griefcc25@outlook.com.

Our services are free of charge, but we do accept optional small gifts to help our clients and others receive free services and to further advance our Educational Ministry. Our purpose is to serve the Lord and to serve others holistically. We hope you accept our proposal as we look forward to hearing from you soon.

Sincerely,

Daphnie Newman Boudy, M.Ed.
